

Ryan Lorentzen

Software Engineer

PROJECTS & EXPERIENCE

AI Classroom Copilot, Florida Gulf Coast University

Full-stack Developer

09/2025 – 01/2026

- Engineered a RAG-based AI assistant using Python and FastAPI to provide citation-backed responses from course materials, improving study efficiency.
- Orchestrated local LLMs via LangChain and Ollama, implementing a vector search pipeline with Chroma/FAISS for high-speed semantic retrieval.
- Established CI/CD standards by enforcing Conventional Commits and a rigorous Pull Request process to ensure codebase integrity.

Go-Go-Gas, Independent Project

Lead Developer

01/2026 – Present

- Architecting a full-stack price-comparison platform using Next.js and TypeScript to optimize consumer navigation and price transparency.
- Developed under Apache 2.0 licensing, prioritizing modularity and open-source scalability for community contributions.
- Optimizing data retrieval and frontend state management to handle high-frequency pricing updates and geographic data.

SKILLS

Hard Skills:

- Python, C++, SQL
- TypeScript, JavaScript
- RAG Architecture
- Vector Databases

Frameworks:

- Next.js, React
- FastAPI, Node.js
- LangChain, Ollama

Tools:

- Git (Rebase/PRs)
- Tailwind CSS
- PostgreSQL
- AWS
- Vercel
- Unreal Engine

EDUCATION

Florida Gulf Coast University

B.S. Software Engineering
GPA: 3.8
Exp: May 2027

OTHER

- Dean's List
- Open Source Contributor
